## PRESS RELEASE

Comtec Racing are pleased to announce their venture into the world of British Formula Three with the new Comtec F.3 team and its first driver signing, Basil Shaaban.

Following the acquisition of P1 Motorsport, Comtec Racing now enters an exciting new arena of competition against the established teams in British Formula Three.

Jonathan Lewis CEO: Commented.

These are new and challenging times within the world of Comtec Racing. Having Roly Vincini as our Head of Engineering, an opportunity arose for us to purchase his Formula Three team. Having within our team the people with the experience and know-how, this presents an excellent opportunity to make full use of their skills. Hence the formation of Comtec F.3.

We will initially undertake with Basil a testing campaign with a view to competing in some National Class rounds later in the season.

Basil Shaaban: Commented.

I am very excited about joining Comtec Racing in National Class F3. With Roly Vincini and the combined experience within the team I stand to benefit significantly on my learning curve. I am confident that the Comtec package will provide me with the best opportunity to showcase my abilities against my competition.

Martin Donnelly, F3 Team Manager: Commented.

Having had previous experience and successes as both a driver and team owner in Formula Three, I sincerely believe that I can guide both Basil and Comtec Racing to success at an early stage in this new venture.

I am under no illusions that the established competition in the championship presents us with strong challenges. However, the team and its personnel are capable of winning races in our first season.

Any info on the above please contact Martin Donnelly at Comtec Racing.
